

# Maria Fareri Children's Hospital

Westchester Medical Center Health Network

*Jeremy Rosenblum, MD and Jared Pisapia, MD.*

Charitable donations from friends like you  
**Advance Care. Here.**

Thanks to your generosity, infants, children and teens who have brain tumors can receive minimally-invasive care at Maria Fareri Children's Hospital Neuro-Oncology Program.

“We are forever grateful to Dr Pisapia and the team at Maria Fareri Children's Hospital for the compassionate care that was provided to my son, Daniel. We were very happy with our experience and the outcome, and would strongly recommend him. We really appreciate all the time that Dr Pisapia took to explain everything to us and to make us feel comfortable.”

**Marlene Lopes** *Mother of Daniel Lopes*

**ADVANCING PEDIATRIC CARE. HERE.**

Your donations support life-saving care at Maria Fareri Children's Hospital, ensuring the babies, children and teens we all love receive the highest possible quality of care closer to home in the Hudson Valley.

---

“Thank you for helping our multidisciplinary clinical team diagnose and treat patients using advanced neuro-oncology technology, such as our new neuronavigation system coupled to the endoscope. The system, a set of computer-assisted technologies used by neurosurgeons to guide or “navigate” instruments within the skull or vertebral column, enables minimally invasive care, positive patient outcomes and faster recovery times.”

**Jared Pisapia, MD, MTR**
